

All Tablet. All BlackBerry.

 **BlackBerry** PlayBook™

The BlackBerry® PlayBook™ tablet with OS 2.0 brings together the best of BlackBerry communications, powerful productivity tools, along with your favorite applications and collaboration tools. So you can make the most out of every opportunity.

Everything you need
from a tablet.
Everything you expect
from BlackBerry.

The best of BlackBerry collaboration comes built in.

Communicate socially

Managing messages, schedules and people has never been this easy. Get your personal and work email, plus your Twitter® feeds, LinkedIn® updates and more, in the powerful unified inbox within the built-in messaging app. From friends and family to co-workers and customers, the new people-centric calendar provides updated information about the people who matter most. And the new contacts app is an information hub of profiles that can display recent status updates and mutual contacts.

Collaborate effortlessly

Nothing beats face-to-face collaboration. With front and rear-facing HD cameras and dual stereo speakers, video chatting between BlackBerry PlayBook users is better than ever. For online meetings, e-learning and webinars, just

download the free Adobe® Connect™ Mobile app from BlackBerry® App World.™ So you can participate in or host multi-point video conferencing – with two-way video presentation capabilities – right from your tablet.

Team up instantly

Use BlackBerry® Bridge™ to connect the BlackBerry PlayBook with a BlackBerry® smartphone¹ to start a BBM™ chat, so you can keep in touch with family and friends, co-workers and teams. Send and receive messages, pictures and more in real time – and know when your messages have been delivered and read. It's great for getting up-to-the-minute information from colleagues, or for sending and receiving pictures and other media for presentations directly from the tablet.

BlackBerry PlayBook delivers a communication experience professionals love by connecting them to customers, communities, friends and family.

Be productive. Stay competitive. Wherever, whenever.

Transform your workplace

Great ideas are boundless. Capture them with the BlackBerry PlayBook. Pair it with a Bluetooth® keyboard and mouse to make almost any space a convenient work place. Close deals from a seat back tray table. Draft reports from a sidewalk café. Take Windows® desktops and apps to go with support for Citrix® Receiver™.² And change the way your work gets done.

Step outside the box

Circulate through a lecture hall as you flip through a presentation. Pause media from a podium on a BlackBerry PlayBook connected to an HDMI-capable TV, monitor or projector. And use your BlackBerry smartphone³ with BlackBerry Bridge to control the tablet remotely and wirelessly.⁴

Stay productive

BlackBerry PlayBook is ready for business right out of the box with the communication tools professionals expect and the business apps they need. Instead of taking notes, use Voice Notes to record important meeting details and listen to them later. Watch product demos on YouTube.⁵ Create and share documents from anywhere, or make edits that just can't wait, with Documents To Go® Premium. You can even print documents as PDFs directly from a PC to a tablet with Print To Go. And get apps for almost everything – data collection, time tracking, business analysis, workflow management and more – from BlackBerry App World.

Always ready for business, BlackBerry PlayBook provides access to the dynamic tools and applications professionals want. So you can do what matters most.

BlackBerry

Ultra Powerful. Ultra Portable. Ultra Fast.

BlackBerry PlayBook delivers the performance professionals need to keep up with the speed of business and the portability to stay productive anywhere.

Sophisticated simplicity

BlackBerry PlayBook is expertly designed to be fast and intuitive. Its elegant interface and simple gestures keep apps and information just a swipe or a tap away so professionals can perform on the go. And staying organized is easier than ever with enhancements to notifications, a priority area for favorite apps, smart folders that create themselves as needed, and panes that glide fluidly to the touch.

Performance powerhouse

Whatever the challenge, BlackBerry PlayBook is up to the task with a powerful dual-core processor and 1GB of RAM. So you can load and run multiple apps quickly and smoothly. It's all backed by renowned BlackBerry battery efficiency that keeps up even on the busiest days.

Real multitasking

Performance means more than just switching between apps. BlackBerry PlayBook delivers true multitasking that lets you work without interruption by running multiple apps *fully and in unison*. Download music, review presentations, surf the web and start video chats, all at the same time. Not just because you can, but because you need to.

BlackBerry PlayBook
takes the stunning richness
of Flash media and dynamic
web-based applications
almost anywhere.

A super-fast Webkit browser engine and built-in support for HTML5 and Adobe® Flash® provide access to incredible web experiences, and put your office intranet sites just a tap away. And the browser's new reading view makes websites easier to enjoy by eliminating page clutter.

Supreme Court to hear range of cases

STORY HIGHLIGHTS

- Few doubt the Supreme Court will take on the health care issue; the question is when
- Opponents key on the "individual mandate" provision in the effort to bring down the law
- They say government does not have the power to force people to buy what they don't want

Washington (CNN) — One of the little-known prerogatives of the U.S. Supreme Court is the justices' discretion to refuse any case on the merits presented to them for review. Only one in 10 petitions actually gets accepted. But though the justices usually say no, when epic disputes arrive at the courthouse steps — by tradition and political reality — the nine members know they are powerless to turn away.

Think segregation. Think abortion. And now the latest divisive

Security and manageability without sacrifice.

Trusted security

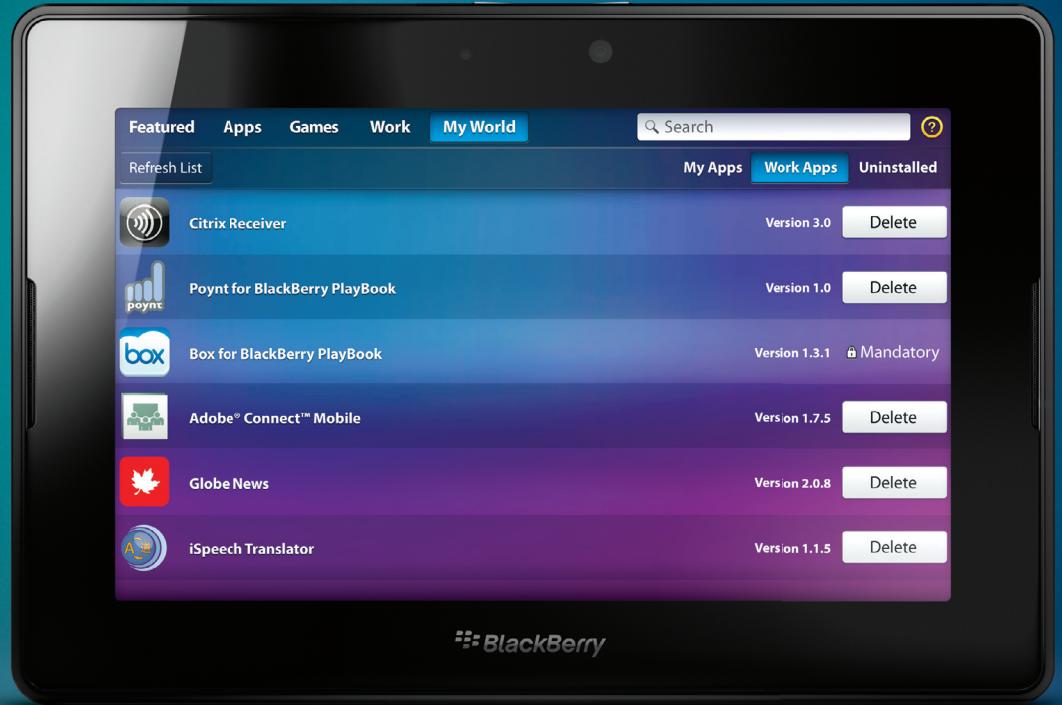

Whether for personal purposes, business or both, the BlackBerry PlayBook protects your information. With its resilient, secure operating system you can deploy BlackBerry PlayBook tablets with confidence. It's the first tablet to achieve FIPS 140-2 certification, making it trusted by governments and other organizations where security is paramount. And you can rest assured as notifications prompt users to install the latest features and security updates as they become available.

Balanced flexibility

When you activate a BlackBerry tablet with BlackBerry® Mobile Fusion, you get all the benefits of BlackBerry® Balance™ technology. It enables the work and personal use of BlackBerry PlayBook tablets that professionals want with the protection businesses need. So whether your organization deploys BlackBerry tablets internally or allows employees to use their own, work apps and data are isolated and can be wiped separately to help ensure sensitive information stays secure.

BlackBerry PlayBook gives your business the security and manageability you expect from the BlackBerry solution.

Simple manageability

BlackBerry Mobile Fusion lets you manage and secure BlackBerry PlayBook tablets using familiar BlackBerry management controls. Wirelessly and remotely set and enforce password requirements, lock and wipe devices, and install and remove required apps. Even optional apps can be cataloged and made available for download by users through the BlackBerry App World storefront.
